

Slam Dunk™

0-21-28

Slam Dunk™ 0-21-28 Contains organic acids and amino acids. Usable ortho-phosphate form for maximum growth and development. The high ortho-phosphate is combined with highly concentrated potassium in the ionic form for maximum uptake, translocation and utilization. This is a combination of two of the essential nutrients required in highest amounts by the plant.

Phosphorus is essential for the myriad energy reactions required in plant metabolism as well as components in the nucleus important in cellular reproduction.

Potassium is necessary for plant-water relationships. This includes stomata regulation and transpiration, enzymatic reactions in glycolysis, Krebs cycle, and over 40 other metabolic reactions requiring potassium to function.

This product fits the grower's need where there is a demand for high concentrations of soluble, usable phosphorus and potassium.

GUARANTEED ANALYSIS

Available Phosphate (P ₂ O ₅)	21.0%
Soluble Potash (K ₂ O).....	28.0%

Application Rates

ADD WATER FIRST TO TANK OR SPRAYER BEFORE ADDING PRODUCT!

AERIAL APPLICATIONS:

Use at least 20 parts water to 1 part of BAICOR® fertilizer. Add at least 20 parts water before introducing product.

FOLIAR APPLICATIONS:

Use at least 100 parts water to 1 part BAICOR® fertilizer. Add at least 50 parts of water before introducing product.

FRUIT, NUT & VINE CROPS:

Including (but not limited to) almonds, hazelnuts, grapes, pecans and walnuts. Apply 1 - 2 quarts per acre. **NOTE:** Before applying to pome or stone fruit, consult your qualified and licensed consultant for recommendations.

FIELD AND VEGETABLE CROPS: Apply 1 - 2 quarts per acre.

GRAIN CROPS: Apply 1 - 2 quarts per acre at 3-4 leaf stage.

TURF GRASSES: Apply 1 - 2 quarts per acre.

SPRINKLER IRRIGATION:

Apply 1 - 2 quarts per acre with irrigation water. Use check valve to prevent back flow into water system

SOIL APPLICATION RATES:

Use at least 20 parts water to 1 part BAICOR® fertilizer. Do not apply directly to seeds unless it has been determined/tested by the consultant or grower that it is not harmful or injurious to the seed.

Maintenance Concentration	1 qt/acre
Beginning Deficiency	2 qts/acre
Severe Deficiency	3 qts/acre
