

Foliar Friend®

“Non-Ionic Sticker / Spreader”

FOLIAR FRIEND® is an organic-based surfactant (wetting agent) that helps fertilizers and other products penetrate deep into the leaves of plants to increase their effectiveness.

It is a special formulation of natural organic materials that act as a surfactant, wetting agent and penetrant. (Decreases the droplet size and maximizes liquid on the leaf surface area of plant.)

FOLIAR FRIEND® also helps to open up the soil and increase penetration.

FOLIAR FRIEND® enhances performance and uptake of nutrients, herbicides and pesticides by assisting in penetration through the waxy cuticles of leaves!
