

# Seed Starter™

1-1-1 + micronutrients

**Seed Starter™** is an alternative to granular seed starter products. It provides ease of use, along with being environmentally safe. **Seed Starter™** contains a natural biological extract to accelerate growth and development of the grass seed with newly seeded or over-seeding lawns. **Seed Starter™** is 100% biodegradable.

**Seed Starter™**, when applied to grass seed or vegetable seed, may increase growth of the root significantly in the first 10 days. It will also establish a larger root mass and provides a shoot that is able to penetrate the soil surface faster.

**Seed Starter™** may also aid the seed to be resistant to disease.

## GUARANTEED ANALYSIS

|   |      |
|---|------|
| Total Nitrogen .....  | 1.0% |
| 1.0% Urea Nitrogen  |      |
| Available phosphate acid (P <sub>2</sub> O <sub>5</sub> ) ..... | 1.0% |
| Soluble potash (K <sub>2</sub> O).....                          | 1.0% |

## APPLICATION RATE CHART

|               |   |
|---------------|---|
| ONCE A MONTH  | 2 Tbs into 1 Gallon of Water - 1oz (29 ml into 3.75 liters)   |
| TWICE A MONTH | 1 Tbs into 1 Gallon of Water - 1/2oz (15 ml into 3.75 liters) |
| EACH WATERING | 1 tsp into 1 Gallon of Water (5 ml into 3.75 liters)          |

### Conversion of liquid measurement:

1 Tablespoon = 3 teaspoons = 1/2 fl. oz. = 14.75 ml  
2 Tablespoons = 6 teaspoons = 1 fl. oz. = 29.5 ml • 1/4 cup = 2 fl. oz. = 59 ml

**SEED APPLICATION:** See the chart above to determine application rates.

- 1) If using a dial hose end sprayer pour **Seed Starter™** into spraying device and set at proper dilution ratio depending on desired application.
- 2) Spray thoroughly on the seed at time of planting.
- 3) Best if not watered for at least 24 hours to avoid washing off fertilizer. This allows uptake of nutrients into the leaf.
