

Foliar Friend

Natural Surfactant

Foliar Friend™ is a natural surfactant (wetting agent) that helps fertilizers and other products such as herbicides and pesticides increase their effectiveness.

It contains a special formulation of natural organic materials that act as a surfactant, wetting agent and penetrant. (Decreases the drop size and spreads liquid on the leaf of the plant.)

GUARANTEED ANALYSIS

NON PLANT FOOD INGREDIENT
Active ingredient 2.0% Saponin

DILUTION RATIO

SURFACTANT

2-4 Tablespoons (1-2 oz.)
into one gallon of water
(29-58 ml into 3.75 liters).

Conversion of liquid measurement:

1 Tablespoon = 3 teaspoons = 1/2 fl. oz. = 14.75 ml
2 Tablespoons = 6 teaspoons = 1 fl. oz. = 29.5 ml • 1/4 cup = 2 fl. oz. = 59 ml

FOLIAR APPLICATION: For best results apply as a foliar early in the morning or late evening. Do not apply as a foliar in drought conditions.

- Adding a few drops of **Foliar Friend™** to other **Baicor® Fertilizers** decreases drop size and enhances wetting of entire blade and leaf surface.

- Walk and spray at a slow even pace to provide uniform coverage.
